A stochastic differential equation (SDE) is a differential equation in which one or more of the terms is a stochastic process, resulting in a solution which is also a stochastic process.

Stochastic differential equation - Wikipedia

In mathematics – specifically, in stochastic analysis – the infinitesimal generator of a stochastic process is a partial differential operator that encodes a great deal of information about the process.

Abstract: We prove exact rate of decay for solutions to a class of second order ordinary differential equations with degenerate potentials, in particular, for potential functions that grow as different powers in different directions in a neighborhood of zero.

We derive a stochastic wave equation for an inflaton in an environment of an infinite number of fields. We study solutions of the linearized stochastic evolution equation in an expanding universe. The Fokker-Planck equation for the inflaton probability distribution is derived. The relative entropy (free energy) of the stochastic wave is defined.

This paper studies the notion of W -measurable sensitivity in the context of semigroup actions. W -measurable sensitivity is a measurable generalization of sensitive dependence on initial conditions.

In neural networks, the learning rate of the gradient descent is a crucial hyperparameter, whose tuning is time-consuming and prevents out-of-the-box training of a model.

Lagrangian ocean analysis is a powerful way to analyse the output of ocean circulation models. We present a review of the Kinematic framework, available tools, and applications of Lagrangian ocean analysis.

1. Introduction Chromatography is a powerful separation method that was developed initially for the extraction and purification of complex mixtures of vegetal origin. Collected fractions were analyzed, identified, and used for further applications, notably synthesis of derivatives.

The downward-sloping yellow line is a demand curve, and the upward-sloping green line is a supply curve. Hopefully that seems familiar. However, we're in a bit of a mirror universe, because we are graphing the supply and demand of expenditure.
